

How the Internet of Things (IoT) is transforming the way we interact with billions of devices everywhere on earth and how you can build generational wealth as the global network expands.

An aerial photograph of a suburban neighborhood with houses and greenery. Overlaid on the image are various digital elements representing the Internet of Things (IoT). A large, glowing blue hexagon with a white circular icon containing a stylized 'X' is prominent on the left. Several vertical lines with glowing blue dots at the top connect the ground to a network of glowing blue dots in the sky. A diagonal dark blue band runs from the top right towards the bottom left, separating the colorful IoT-themed left side from the grayscale right side.

Lin[ⓧ]STR

Building Generational Wealth With IoT

About Us

LinxSTR is an IoT Network Integrator that works with individual property owners and management companies to connect properties to the largest IoT network in the world, Helium. Individuals who participate enjoy unprecedented passive income and a pathway to creating generational wealth. Once a hotspot is installed, each connected device generates Helium Network Tokens (HNT) crypto currency every day. Our experienced team of business and engineering professionals do the heavy lifting, while our participants earn royalty rewards.

Message from the Founder

IoT technology integration is at the heart of the latest transformation of the world's data communications grid. Today, Helium (www.helium.com) is rapidly expanding the world's largest IoT network with a business model that shares the financial upside with LinxSTR property locations that power the network.

Soon, low-frequency, long distance data networks will connect billions of devices, sensors and applications in millions of homes and buildings around the world. These devices enable the Smart Homes and businesses of the future in ways that continue to unfold right before our eyes. Billions of data transfers are already running through IoT networks, because the cost of data transfer is far less expensive than on high-speed networks or cellular networks.

In the years to come, nearly every home and business on earth will be connected to IoT networks that securely collect and transfer sensor data from multiple devices and applications in real time, dramatically increasing efficiency, security and connectivity. LinxSTR offers a simple opportunity into the IoT world that pays you daily. LinxSTR gives you the entry point as IoT grows into mainstream, just like cellular and Internet did before.

Read on to learn how IoT will transform the way people and businesses interact with billions of devices, sensors and applications and how we can get you into the game today!

What's in this for you?

Build a High-Profit Passive Income with LinxSTR

The biggest opportunity in network technology since cellular phones is upon us!

Learn how you can participate with LinxSTR to earn passive income, hedge against inflation, create generational wealth and leave a legacy for your loved ones. In addition, LinxSTR will make a 1% HNT contribution to your favorite charity.

1 PASSIVE INCOME (CASH FLOW)

You will earn passive income as Helium hotspots process data and mine HNT daily (24x7). There is no need to wait for monthly or quarterly returns as your income is placed directly into your digital wallet. You are free to let the HNT accumulate and/or convert the HNT into US Dollars at anytime.

2 HEDGE AGAINST INFLATION

If you have filled your gas tank lately, bought groceries or purchased airfare you know firsthand that inflation is soaring. Most economic forecasters predict inflation for at least three more years. The annual inflation rate in the US surged to 6.2% in October of 2021, the highest since November of 1990 and above the forecasts of 5.8%. Mining HNT diversifies your portfolio and makes a great hedge against the fluctuating US dollar.

FAMILY LEGACY AND GENERATIONAL WEALTH

3

We all want to leave a legacy for our loved ones and future generations. Working with LinxSTR provides a great way to do that because Helium is just beginning to embark on a 50 year plan that foresees millions of hotspots in the US alone. Eventhough, Helium is already the global leader in IoT. By getting in early and riding the wave, you can create something for yourself now and for generations to come. That's an unbeatable win-win for today and tomorrow.

CHARITABLE CONTRIBUTION

4

Furthermore, LinxSTR will donate an additional 1% of HNT from the hotspots that you are participating in to the charity of your choice. This is a great way to make an impact through sustainable giving.

“Internet of Things is transforming the everyday physical objects that surround us into an ecosystem of information that will enrich our lives. From refrigerators to parking spaces to houses, the Internet of Things is bringing more and more things into the digital fold every day, which will likely make the Internet of Things a multi-trillion dollar industry in the near future.”

- PricewaterhouseCoopers report

“The internet is no longer a web that we connect to. Instead, it's a computerized, networked, and interconnected world that we live in. This is the future, and what we're calling the Internet of Things.”

- Bruce Schneier

LinxSTR's professional installation team guarantees prompt installation and minimal interruption.

Standard installation and Hotspot configuration generally takes less than 2 hours. When exterior antenna installation is required, our installation team can schedule appointments at your convenience when the property is unoccupied. Once installed and properly configured, the device manages itself and rarely needs servicing. In the event that the Hotspot does require servicing our team will schedule for prompt servicing.

Mission & Vision

LinxSTR positions property owners and managers to leverage the immense potential of IoT, so they can generate passive income and create generational wealth and legacy for their loved ones as we expand the largest IoT network.

How You Get Paid

You will download your own Helium Wallet and get paid everyday. Your earnings will be in the form of the HNT cryptocurrency. You can transfer your earnings into US Dollars anytime, or retain them as HNT and compound your profit as HNT grows in value.

You can expect each IoT device to generate about 1/4 of an HNT token every day, though many devices can generate 1/2 to 1 or possibly more HNT daily through our unique property vetting analysis.

Our Proprietary Hotspot Design

About Helium

Helium is the largest and fastest-growing IoT network in the world. In just 26 months, Helium has built a functional, yet limited, network of more than 600,000+ hotspots which are the nodes of the Helium blockchain. These hotspots also serve as wireless base stations for the IoT network in over 3,800 cities around the world.

Helium is backed by major investors from both Silicon Valley and Wall Street, with total invested capital of more than \$364 million dollars. Helium's market leadership is grounded in significant proprietary technology that enables scalability of the network while protecting the value of each hotspot and the Helium HNT cryptocurrency.

FASTCOMPANY

2 Ways to profit with LinxSTR

12 Pack | \$27,750

12 Helium Hotspots included
120 Certified Property Evaluations
12 High-Gain Antenna's included
12 Installation Kits included
Advanced Installation Included*
Maintenance included
Monthly HNT Payout of 50%
100% Passive Opportunity

24 Pack | \$49,000

24 Helium Hotspots included
240 Certified Property Evaluations
24 High-Gain Antenna's included
24 Installation Kits included
Advanced Installation Included*
Maintenance included
Monthly HNT Payout of 50%
100% Passive Opportunity

To order, please email us at support@boomstr.com or call us at **1-833-546-9787** to reserve your 12 or 24 pack while inventory is available.

FAQS

What happens if a property is sold?

If the device remains with the home and continues to operate, LinxSTR will continue to compensate you monthly. If the device is removed and recovered by LinxSTR, we will replace the device in another property.

What happens if a device is broken?

LinxSTR coordinates the repair and/or replacement of devices.

How soon can a device be installed at my property?

Hotspot installation will begin in March 2022. We will install on a first-come, first-served basis.
